DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-41** are allowed.
2. **Claims 1-41** are renumbered.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-3, none of the previous art of record teaches or suggests fitting each and every segment in the spectroscopic range with an approximating K-K consistent oscillator structure, the approximating oscillator structure in each segment beginning and ending at the start and end of said segment to which it is fit such that a summation of contributions from the oscillator structures present at each point within the spectroscopic range approximates the imaginary part of the dielectric function, and because of the K-K consistency the real part of the dielectric function is also approximated, in combination with the rest of the claim limitations.

Regarding claims 4-41, none of the previous art of record teaches or suggests placing a second K-K consistent oscillator which begins at a wavelength at which the first K-K consistent oscillator peaks and ends one wavelength range segment length therefrom and has a peak midway there between, then performing a point by point fit to the imaginary part of the dielectric function data over the first and second wavelength range segments such that K-K consistent oscillator defining parameters in the first K-K consistent oscillator are re-evaluated and oscillator defining parameters in the second K-K consistent oscillator are evaluated, in combination with the rest of the claim limitations

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
